

## FUND AIMS AND OBJECTIVES

The Titan Global Balanced Fund's main objective is to generate capital growth by investing into a combination of fixed income and global equities. The underlying investments are selected using a thematic investment process. Titan Global Balanced Fund is a sub-fund of the Titan Global Investment Fund; an open-ended, multiclass Unit Trust authorised as a Class B Scheme by the Guernsey Financial Services Commission.

## COMMENTARY

The arrival of Diwali marking the beginning of the financial year in India was greeted by investment markets continuing to climb the wall of worry spurred on by robust corporate earnings, share buybacks and an easing of Sino-American trade tensions. GBP investors saw returns of +4.5% from global equity markets while global bonds delivered attractive returns but failed to match the performance of equity markets, delivering a return of +2.2%. In this environment, the Global Balanced Fund returned +2.8% in October, taking year-to-date performance to +9.0%, which is significantly ahead of cash rates and ahead of the prevailing rate of inflation.

Inflation in America was supportive for investment markets surprising on the downside. It appears to be benefiting from some tariff passthrough, allowing the Federal Reserve to deliver another 0.25% interest rate cut, bringing the guidance range down from 3.75% to 4%. Jerome Powell is doing his best to stop markets getting ahead of themselves as he cautioned that a further interest rate cut in December was not a foregone conclusion.

The sweet spot in equity markets this month have been technology, Asia and emerging markets. This has seen BlueBox Technology and Polar Asian Stars rise +9.5% and +7.6%. The notable laggard this month was Lazard Global Equity Franchise, which returned -1.4% underperforming global equity markets by -6%. Part of this is attributable to a stock specific issue with Fiserv (4.8% position in the fund), which fell -44% in one day on the back of disappointing earnings. We are discussing the performance of Fiserv and the fund with the fund manager, Bertrand Cliquet.

We have undertaken a rebalancing of our global equity exposures; we exited Fundsmith, which was a 2% position, and trimmed the remaining global equity funds back to 5% positions. The funds raised have been used to introduce two passive regional exposures; 3% in Vanguard S&P 500 ETF and 3% in Vanguard FTSE Developed Europe Ex UK ETF. At a holistic level this boosts our European equity exposure and modestly reduces our US equity exposure as more than half of the global equity exposure sold provided exposure to American equity markets. It also increases the level of passive exposure to American equity markets, which are considered to be the most efficient of regional equity markets.

Financial promotion - the value of the Fund may go down as well as up - you may get back less than you invested.
